The Plastic Processors all in one source!

I am pleased to introduce our capabilities in precision cleaning and rebuild capabilities of all brands and makes of hot runner tooling. We have been servicing the plastic industry for 18 years offering many replacement components and engineering services. Thermal-Tech Systems provides molders an alternative source providing quality and savings for hot runner components, Slide aerosol products, electrical heaters, and control accessories.

Thermal-Tech provides RUSH services, free pick up, and delivery on rebuild and specific cleaning services within a 200 mile radius of our facility catering to each customers requirements. Our services also include precision manifold and component cleaning services. Our services are tailored to your requirements for cleaning to complete hot runner rebuild. We are centrally located in the Midwest and have the largest fluidized cleaning system in servicing the largest to smallest cleaning requirements. I would greatly appreciate your comments in how our services and savings can benefit your tooling. Please feel free to call me for consultation of our products and services. I have enclosed our line card listing and specific product brochure offers and services. I look forward to your comments in my follow up.

Regards,

Larry Ehardt
